

Guardian 275® - Tough & Dependable Daylighting +

HURRICANE PROTECTION

DON'T SACRIFICE THE ENERGY-SAVING BENEFITS OF DAYLIGHTING FOR SUPERIOR HURRICANE PROTECTION - GET BOTH!

Major Industries' Guardian 275® Translucent Systems, approved for use in most Florida counties, the Texas Gulf Coast and more than 95% of the hurricane zones in North America, can be configured to provide unmatched protection from the elements while allowing glare-free natural light to illuminate building interiors.

In order to receive Florida approval, Major's Guardian 275® Translucent Systems had to withstand a variety of missile impact, water and air infiltration and pressure load tests. Guardian 275®, with its unique design and use of high-performance materials, offers strong protection without sacrificing the numerous health and environmental benefits that daylighting provides.

Guardian 275® hurricane systems were also the first translucent panel daylighting system to receive Texas Department of Insurance (TDI) approval (#RWA-01) for use along the Texas Gulf Coast.

Guardian 275® - Tough & Dependable **HURRICANE PROTECTION**

Guardian 275® translucent panels feature a tough sandwich-style construction consisting of an aluminum grid core between two high-performance face sheets. In any configuration, Guardian 275® systems are lightweight, provide enhanced thermal performance over standard glass systems and feature integral water management systems and high-performance gasketing to ensure weatherproof performance.

Testing Criteria and Standards

- ASTM E1886 / E1996 - Large Missile Impact Resistance (Wind Zone 3, Missile Lev. D)
- ASTM E331 Water Penetration
- ASTM E330 Structural Performance
- ASTM E283 Air Infiltration
- Florida Approval Numbers -
FL13504-R4 (wall system - Wind Zone 3, Missile Lev. D),
FL13456-R3 (skylight - Wind Zone 3, Missile Lev. D)
- Texas Department of Insurance Report Number - RWA-01

ABOUT MAJOR INDUSTRIES

Major Industries has been engineering and building skylights and translucent wall systems to fit your needs - and your budget - since 1980. We've long been advocates of utilizing daylighting to combat energy costs and improve occupant comfort, which is why we offer high-quality, cost-effective daylighting solutions that let light in and keep water out.

We work closely with architects and specifiers every day to develop high-value designs—it's a responsibility we take seriously. We strive to produce daylighting systems that owners demand and deserve. From simple translucent wall systems to complex custom skylights, you can rely on the people at Major to help you arrive at a reliable and cost-effective solution for your next project.

Contact us today to find out more about our hurricane protection systems, or see our complete line of custom and pre-engineered daylighting solutions at www.majorskylights.com.
