

UNITIZED & PRE-ASSEMBLED SYSTEM OPTIONS

WE CAN HELP MAKE INSTALLATION QUICKER AND EASIER WITH A NUMBER OF CUSTOM-BUILT SOLUTIONS

PRE-ASSEMBLED SYSTEMS

Select smaller sized skylights and wall systems can be shipped to your site pre-assembled – greatly reducing the amount of installation time required on a typical job. From small single slope skylights that can be dropped onto a curb ready for final installation, or wall panels that can be easily installed from inside the building, we'll work with you to find the right solution for your installation challenges.

Major also offers a small number of LightBasic™ skylights and wall systems on our online store – shopmajorskylights.com – as well as select Auburn® glass skylights. It's a great option if you need a skylight quickly and don't need a custom designed solution.

Not sure if a pre-assembled system is worth it for your project? Check out our time-lapse demonstration in our online video gallery at majorskylights.com to see just how quick and easy it can be to install a pre-assembled wall system vs one that needs to be fully installed on-site.

PARTIALLY ASSEMBLED SYSTEMS

While there are times when a fully assembled system can be of use, other situations might call for a more nuanced approach. For skylights with integrated end walls, for example, we can pre-assemble the more complex end wall connections so that you can limit install time on-site. The same is true for complex polygons or pyramids, where some connections can be pre-assembled to make it easier for a smaller crew to install. If you have a unique situation that calls for a similarly unique solution, contact us and we'll work with you to find the right solution.

UNITIZED SYSTEMS

If you're looking for a way to incorporate a mixed glazed wall system, or perhaps a translucent panel wall system with integrated louvers or insulated metal panels (or all of the above!), we can design and build unitized systems that come pre-assembled and ready to install into your existing opening. Not only does it save on installation time, but you can be assured that you'll receive a fully integrated and precisely constructed unit that doesn't look "pieced together". And we'll also work with you to provide the proper lifting tabs or other means to ease installation.

If your next project calls for more than just a "typical" skylight or wall system, contact our sales team at 888-759-2678 or sales@majorskylights.com to find out more about this great custom daylighting option.
