

HEALTHCARE FACILITIES

HOSPITALS/CLINICS/MEDICAL CENTERS

From improved recovery times to better worker attendance, daylighting systems offer a wide range of benefits for healthcare facilities beyond their beauty and functionality. The following examples are just a few design possibilities available with Guardian 275[®], Clima-Tite™ and LightBasic™ translucent panels, IlluminPC™ polycarbonate multi-wall, and Auburn[®] glass and mixed glazed skylights.

ENTRANCES & HALLWAYS: Welcome building occupants and visitors and protect them from the elements with a bright and welcoming outdoor canopy or “pass-through” skylight that draws people into the facility. Once they’re inside, open up confined spaces by incorporating a skylight or row of multiple skylights - they’re perfect for illuminating well-traveled areas with natural light.

GATHERING AREAS/WAITING ROOMS: Cafeterias and common areas are more welcoming when enhanced with natural light—and the cost savings can be tremendous when compared with having to light these spaces solely with artificial lighting, especially since they’re at their busiest during peak energy use hours. Translucent systems also protect patients and visitors by obscuring direct views, allowing for an additional sense of privacy.

WORK SPACES/LAB FACILITIES: Our translucent panel systems are the perfect solution for bringing glare-free natural light to a variety of work spaces where computer screens and other electronic devices are in use.

MRI & MEDICAL EQUIPMENT ACCESS, INTEGRATED OPERABLE WINDOWS & MORE: Major offers a wide variety of daylighting systems that allow for numerous design options and flexibility with light control, ventilation, security and more. We offer mixed glazed systems that incorporate fixed or operable windows for ventilation and views to the outdoors, as well as removable skylights that allow for easy access to medical equipment.

Daylighting Design Guide

HEALTHCARE FACILITIES

IMPROVING BUILDING PERFORMANCE WITH DAYLIGHTING

ENERGY/COST SAVING: Utilizing natural light reduces energy use and related costs. Insulation can also be added to our translucent panel systems for enhanced thermal performance.

TOUGH: Third-party testing and in-the-field performance proves that our Guardian 275® skylight and wall systems are built to last - in any climate and situation.

NOT "STRIPPED DOWN": No-charge integral water management, high-performance sealants and innovative glazing - such as our Ultimate Series™ FRP - go beyond industry standards.

ECONOMICAL: Competitive pricing - combined with industry-leading warranties - ensures that you're making the right investment for your project and budget.

VERSATILE: We offer everything from custom skylights and wall systems to Quick Ship™ options that can be delivered within days. Our Clima-Tite™ systems, which feature corrosion-resistant pultruded fiberglass support members, are also highly impact resistant and are electrically non-conductive.

WHY MAJOR IS THE RIGHT CHOICE FOR YOUR DAYLIGHTING NEEDS

Major's full line of skylights and translucent wall systems can benefit both building occupants and the bottom line.

- Translucent panel systems offer glare-free natural light without hot-spots, as well as insulation options for enhanced thermal performance
- Guardian 275® and Clima-Tite™ wall systems can be configured with operable windows, and we have numerous other mixed glazing options for both wall systems and skylights.
- TAP (Translucent Adapter Panel) systems that can integrate with existing curtainwall framing
- Clima-Tite™ systems offer the benefit of pultruded fiberglass support members for enhanced thermal performance and corrosion resistance.
- Field-tested strength, color-retention and durability - all backed by industry-best warranties
- Integrated water management systems are standard on most systems
- Incorporating daylight provides health benefits like improved mood and productivity, as well as energy savings and reduced HVAC loads
- LEED® credit opportunities
