

# BUILT-IN BENEFITS

## DON'T SETTLE FOR ADD-ONS

Major has long been committed to providing the best daylighting systems in the industry, and part of that goal involves giving you the options you need without adding extra costs.

### BUILT-IN MOISTURE MANAGEMENT

We start with including a built-in moisture management system, consisting of high-performance EPDM gaskets that keep moisture out, and weep holes and integral gutters that allow condensing moisture to escape to the exterior of the system.

### FASTENER COVERS STANDARD FOR WALL SYSTEMS

Major's Guardian 275® translucent wall systems also feature standard covered fasteners, allowing for a cleaner and more modern look. Our Clima-Tite™ systems also have a similar look thanks to their snap-to-lock caps that provide a fastener-free exterior.

### KYNAR® FINISH OPTIONS

All of our aluminum framed systems are available with Kynar® finishes - the "gold standard" in the industry. Kynar® high-performance architectural fluoropolymer coatings (PVDF resin-based coatings) offer excellent color retention, salt-spray resistance, simple field touch-up and repainting capabilities and a vast range of color options - and can meet AAMA 2604 (50% Kynar®) or 2605 (70% Kynar®) specifications. High-performance anodize finish options are also available (AAMA 611 Class I Anodize Finish).

### PRE-ASSEMBLED OPTIONS FOR QUICK INSTALLATION

Major can also offer you ways to save money on the jobsite. From partially assembled systems to pre-assembled end walls and complete systems, we will work with you to find the right solution for your project, and can work with you on a custom solution if needed.

### SAFE & SECURE PACKAGING

All daylighting systems that leave our facility are securely packed and crated, from translucent panels to metal framing to fasteners and small parts. This allows for reduced shipping claims (which we can also handle if needed), and fewer unexpected hassles and delays on the jobsite. Each crate and box is also clearly marked with its contents and its relationship to the building plans, allowing for easy identification on-site.

### LONGER LIFE & BETTER WARRANTIES

Guardian 275® systems feature tough and dependable Ultimate Series™ FRP face sheets. Designed in cooperation with CRANE Composites®, the world's largest manufacturer of architectural fiberglass, Ultimate Series™ offers available industry-best 20 year color change and 25 year fiberbloom warranties.
